☑ Show comments

```
1.  class DeleteCommentUseCase {
2.    constructor({ threadRepository, commentRepository }) {
3.      this._threadRepository = threadRepository;
4.      this._commentRepository = commentRepository;
5.    }
6.
7.    async execute(useCasePayload) {
8.      this._validatePayload(useCasePayload);
9.      // periksa thread
10.     await this._threadRepository.verifyAvailableThread(useCasePayload.thread);
11.     // periksa comment
12.     await this._commentRepository.verifyAvailableComment(useCasePayload.id);
13.     await this._commentRepository.verifyCommentOwner(
14.       useCasePayload.id,
15.       useCasePayload.owner
16.     );
17.     // soft delete komentar
18.     await this._commentRepository.deleteComment(useCasePayload.id);
19.   }
20.
21.   _validatePayload(payload) {

          Pastikan use_case hanya berisi tentang proses delete comment, alih alih kamu membuat validatePayload

22.     const { id, thread, owner } = payload;
23.     if (!id || !thread || !owner) {
24.       throw new Error('DELETE_COMMENT_USE_CASE.NOT_CONTAIN_NEEDED_PROPERTY');
25.     }
26.
27.     if (
28.       typeof id !== 'string' ||
29.       typeof thread !== 'string' ||
30.       typeof owner !== 'string'
31.     ) {
32.       throw new Error(
33.         'DELETE_COMMENT_USE_CASE.PAYLOAD_NOT_MEET_DATA_TYPE_SPECIFICATION'
34.       );
35.     }
36.   }
37. }
38.
39. module.exports = DeleteCommentUseCase;
```
